ISO 14001
OHSAS 18001

ISO 14001:2015 was awarded in December 2016 and it sets out the criteria for an environmental management system and can be certified to. It maps out a framework that a company or organisation can follow to set up an effective environmental management system.

OHSAS 18001 – The standard is designed to clarify an organisation's impact on health and safety issues, as well as help to reduce the risk of accidents and any breach in legal requirements.

ISO 9001. We operate a quality management system which complies with the Bureau Veritas requirements BSEN ISO9001: the European standard for all processes and systems and those of our manufacturing partners. We have held this certification since 1994.

In 1999 we achieved the Investors in People standard which provides a framework helping us to improve performance and realise objectives through effective management and development of people.

Supplier code of conduct

We hold our suppliers to a strict Simon Jersey code of conduct, holding them to specific requirements for supplier performance pertaining to: human rights, labour rights, anti-corruption measures and environmental responsibility. The code is applicable to all suppliers

as well as our own facilities, including a full mandatory compliance programme, with five levels of compliance. All national and local laws, regulations and statutory requirements must also be met. Independent audits are completed to assess levels of compliance, ongoing.

Social responsibility

The pulp used to make the paper for this catalogue is FSC certified and sourced from forests that are managed to protect wildlife habitats and respect the right of local communities

Please act responsibly by recycling this catalogue, as the whole catalogue is fully recyclable, which helps us to reduce our carbon footprint.

Communities

We aim to support a variety of good causes, locally and globally, through donations of workwear and fundraising at company events including Smartworks and Suited and Booted.

GIVE YOUR BUSINESS THE PERSONAL TOUCH

There's no simpler or more cost-effective way to promote your company brand than on the uniforms of your workforce. By adding your company logo, promotional slogan, job roles or names to their garments, you're exposing your brand to each and every customer your team comes into contact with.

EMBROIDERY

Flexible enough to be used on almost any part of any garment. Best used for small to medium sized designs.

SCREEN PRINTING

The best solution for adding large bold messages, logos, designs or text. Best used on non-textured fabrics.

TABBING

A subtle, sewn in tab label adds prestige to any garment. Best used on suiting, shirts/blouses and tunics.

BADGES

The simple, non-permanent way to add your logo to your staff uniforms. Provides flexibility to wear on different garments.

You can embroider up to three rows of text by creating your ideal combination below. Please speak to your local representative for any help, advice or to place your order.

IMPORTANT INFORMATION

PLEASE PROVIDE CLEAR WRITTEN INSTRUCTION.

To ensure the accuracy and quality of finished goods, we are not able to accept personalisation instruction by telephone.

Personalised garments are **non-returnable** and we recommend that you sample and try garments for fit, before ordering your design application.

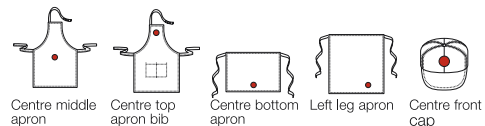

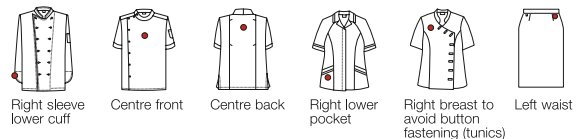

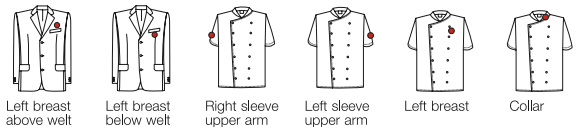

DON'T FORGET TO SEND US YOUR ORIGINAL ARTWORK.

Personalisation is a complete service supplied to customers purchasing uniforms from Simon Jersey and design files remain the property of Simon Jersey. Copy design file discs are not available as independent mail order items. Your design instructions are important to us, as this is a chargeable service (see set-up tariff above).

Standard delivery charge applies and garments will be at catalogue price +VAT (or to Corporate Contract tariff).

STANDARD PERSONALISATION POSITIONS

Standard positions to the left or right side (as garment is worn).
Embroidery on pockets makes them non-usable.

HOW TO MEASURE

It is important to measure every member of your staff correctly. That way a fit, as close to 'made to measure' as possible is ensured. The tape should be snug but not tight. Don't worry about allowing inches for movement, all our designs take this into account. For a fit that will stay comfy all day long, always consider sizing before ordering. The correct fit should provide freedom of movement and optimum comfort.

UNIFORM ADVICE

No matter what image you're aiming for, we can help you to pick a consistent, co-ordinated look across your whole team. As a rough guide we suggest a minimum of one jacket, two skirts or two pairs of trousers and three shirts, blouses or tunics per person (one being worn, one in the ironing pile and one in the wash). And as every purchase from Simon Jersey is an investment in quality, our garments will keep you and your team looking good longer than cheaper alternatives, which wear out quicker and need replacing more frequently.

SIZE AND FITTINGS

Our uniforms come in a wide range of sizes. Please see individual garment descriptions to see what range of sizes we stock for each style. All sizes shown in garment descriptions are approximate. Whilst we make every effort to achieve a high standard of consistency, due to the limitations of the manufacturing process the specific measurements of garments by size may have slight differences to the size chart shown on page 258.

GARMENT CARE

The majority of Simon Jersey styles are machine washable. Please ensure the care instructions sewn inside each item are followed to maintain the appearance and life expectancy of your Simon Jersey garments. To spread the level of wear and tear evenly across all the items in a uniform allocation we advise that garments should be worn in rotation. As part of our commitment to social responsibility and the environment our shirts, blouses, knitwear and Polyester suiting can be washed at 30°. For more information visit www.simonjersey.com/30degrees

FREE IRON ON HEM TAPE

On selected garments we include a small pack of free iron on hem tape, with pieces cut to size and full instructions on how to self-hem trousers easily to required length.

FABRIC

Where fabrics are a blend of more than one material the % split shown in the garment description are approximate and may alter slightly by batch.
