**COOKWARE BROCHURE**

*We are delighted to offer our Cookland cookware products, manufactured by our Research and Development Department in our world-renowned factory using a cutting-edge technology, to our valued customers.*

*Our porcelain cookware, can be used in many different ways. It has a modern design and advanced technical properties. Pots, pans and overware made with Cookland technology, which we have developed as a result of our long-term R&D studies, have a unique design and superior technical features.*

*Cookland cookware offers a unique cooking experience as well as decorating your table as a presentation item with its modern and aesthetic appearance representing elegance and grace.*

*Cookland cookware is divided into two groups based on the area of use as Cookland Induction and Cookland Fire. Since they are manufactured at high temperatures Cookland cookware products do not contain toxic heavy metals such as lead-cadmium. No taste or odor permeates your food. They do not contain any germs due to their consolidated structure.*

*They have a scratch-resistant surface and can be easily cleaned thanks to the texture brought by the special glaze formulation.*

*They have a high resistance to detergents and similar chemicals. Containing completely natural components, our products have superior hygienic features as well as being eco-friendly.*

*We hope you set joyful and enjoyable tables inspired by our Cookland healthy cooking and presentation products!*

*Best Regards  
**Portland***

A modern design that represents  
elegance and grace...

You can cook on gas, ceramic and electric stoves with Cookland cookware. In addition, Cookland Induction products have a special magnetic coating in the base, which allows you to cook on induction stoves.

Cookland cookware is ideal for use in the oven.

You can have a unique cooking experience by using Cookland cookware on your barbecue.

You can easily heat your food in the microwave.

Cookland cookware is resistant to scratching and abrasion thanks to their special glaze composition.

You can use the lid and the cookware itself as a presentation item. Thanks to its elegant design, the pot lid can also be used as a hot pad, dessert plate, serving plate and cheese plate.

Cookland cookware that will add aesthetics to your table with their elegant design keeps the food hot for a considerably longer period of time compared to metal cookware.

Cookland cookware can be used in the refrigerator and freezer. They save space as they are stackable.

You can clean Cookland cookware, which has an easy-to-clean texture, both by hand and in the dishwasher.

The lids are designed to facilitate stacking of products on top of one another.

They save space as they can be stacked one within the other.

Containing completely natural components, our products have superior hygienic features as well as being eco-friendly.

Cookland cookware has been tested according to **EN<sup>1183</sup>** (resistance to thermal shock<sup>1</sup>) and **EN<sup>1217</sup>** (water absorption test methods of ceramics<sup>2</sup>) by Lucideon, an independent material testing and consulting provider.
