**MADE IN GERMANY**

der Umwelt zuliebe

## terra | nori.

Unique, multicultural, without any kind of reservation. From modern fine dining to traditional cuisine, from Mediterranean to Asian all the way to vegetarian or maybe vegan cuisine.

**Completely individual.** Porcelain can be so very versatile ...

A great atmosphere means: **Socializing, exchanging and enjoying the time spent together.** Informal, without etiquette - simply casual fine dining. At the same time, the porcelain has to be both chic and practical. For extraordinary, timeless and lasting moments...

**noir.**

# seaweed.

**NORI** – the seaweed – as a marine plant, it probably represents one of the biggest influencing factors in binding carbon dioxide from the atmosphere.

Seaweed is also being discussed as a future superfood. In combination with an appealing – or even staged culinary presentation, NORI draws an interdisciplinary worldview.

Staging – instead of presenting. What counts is culinary craftsmanship.

# nori.

# precision.

When it comes to balancing the subtle difference – that's when true precision is needed.

In many ways and in many areas. This is how a feast for the senses is created. As precisely as a tattoo is engraved or a special cocktail is coordinated, as accurately a relief is incorporated into porcelain. A fascinating connection between art and culture.

**mori.**

**white bisquit | black bisquit.**

Timelessly simple and uniquely daring. The exquisitely crafted Bisquit items from the **NORI** series are truly breathtaking.

# the earth.

Made of fire, air, water and earth – *expressed somewhat poetically* – the porcelain series **TERRA** is an allegorical representation of our planet.

The finish reminds you of that certain **»craftsmanship«**, where viewers automatically look for the irregularities that are inherent in each unique piece.

The porcelain series **TERRA** grounds the viewer and simply comforts the soul ...

# terra.

# terra color glaze.

With four earthy shades complementing the timeless white, **TERRA** Color Glaze revisit the formative inspiration.

The colors **Earth Brown**, **Moss Green**, **Pearl Gray** and **Sand Beige** can be excellently combined with each other as well as with white, suiting any upscale interior and setting a fine accent.

terra.

The finely embossed, organically shaped surface is **exciting yet calm** – the ideal stage for culinary works of art.

# trends out of the bowl.

The success of food presentation stands and falls, among other things, with the appearance of a dish and, especially in this day and age, a certain »**instagramability**« is almost a necessity.

With our new series **NORI** and **TERRA**, you are invited to invest in a contemporary and aesthetic presentation of your culinary delights.

For both unique and appealingly modern culinary themed staging, our **FOODBOWLS** are available in many sizes and colors.

nori.

NORI. Going completely different ways, daring to do something new. **Living your own personality – and showing it.** Pushing through these new paths and being confident in them. This is especially true for experimental cuisine ...

terra.

TERRA. The relief-like, spiral structure can certainly be interpreted as circling. The glaze, which is naturally applied unevenly due to its shape, underlines this impression, provides constantly **changing light reflections** and triggers pleasantly »homey« emotions in the guest.

available articles.

microwave-proof | dishwasher-proof | long-lasting availability | optimal combinability
