**Porcelains shaping the future in
the pursuit of sustainable design.**

We are aware of the importance of design and longevity in sustainability, aiming to leave a more livable world for future generations, going beyond conformity to trends. With this awareness in our sustainability journey, we have reshaped porcelain to utilize global resources in a sustainable way. While contributing to a circular economy in the fight against climate change, we consider it our duty to minimize environmental impacts in our business processes and add value to nature.

Environment Management.

As Porland Porcelain, we consider the environment as a valuable treasure and believe that it should be preserved in the best possible way for future generations. In line with this belief, we are among the founders of the Yuvam Dünya Association, which is dedicated to raising environmentally respectful generations for potential challenges that may arise in the future. In our efforts to combat climate change, we aim to develop environmentally friendly and efficient production in areas such as energy, greenhouse gas and air emissions, as well as water, responsible material consumption, waste management, and biodiversity, in order to reduce their negative impacts. We continuously monitor, develop, and improve applicable elements of legal requirements to minimize our impact on society and the environment, while ensuring maximum efficiency and cost savings for the sustainability of production in the future.

Energy and Climate

Climate change, which has the potential to create risks not only in the physical environment but also in social and economic life, is one of the most critical global issues of our time. Considering the upward trend in energy demand and greenhouse gas emissions, we can anticipate that climate change has the potential to pose much greater risks. Porland Porcelain integrates the ISO 14001 Environmental Management System with the ISO 9001 Quality Management System and ISO 50001 Energy Management System. Aligned with our commitment to combating the climate crisis and our sustainability approach, we aim to minimize the environmental impact of our products throughout their life cycle by effectively managing all stages of the value chain. We view efforts to combat climate change not only as a necessity to enhance our quality of life and mitigate risks in the future but also as a crucial method for reducing operational costs and gaining a competitive advantage in the economic life of the future. Activities focused on improving energy efficiency and reducing greenhouse gas emissions constitute a significant portion of our efforts to combat climate change. These endeavors not only decrease emission levels but also contribute to our competitiveness by providing cost advantages. Therefore, we consider energy efficiency as a continuous improvement area and implement improvement projects at every stage of our operations. All other air emission values generated during our production processes, such as greenhouse gases, are also part of our control and improvement efforts. We measure air emission values at all production locations at specified intervals in accordance with legal permits, keeping them well below the limit values.

Waste Utilization

We transform defective or non-compliant white porcelain, both glazed and unglazed, whether fired or unfired, by grinding them to be reused as raw materials. Additionally, the sludge generated from the treatment plant is reconsidered in the recipe to achieve savings. Through this business model, we achieved a yearly recycling of 301.2 tons of raw materials, making an impact in various aspects:

- **The need to extract 301.2 tons of raw materials from quarries was eliminated, reducing the impact on landscaping and the energy required for extraction/treatment.**
- **The transportation of 301.2 tons of raw materials from the points of origin to Porland Porcelain was avoided, resulting in savings in vehicle emissions and fuel usage.**
- **301.2 tons of waste material that would have been sent to the landfill became reusable, reducing the fuel and vehicle emissions generated for waste transportation and minimizing the impact on the landfill site and the environment.**
- **The recovery of 301.2 tons of raw materials prevented the emission of 735.13 tons of CO2 greenhouse gases during the production stage alone.**

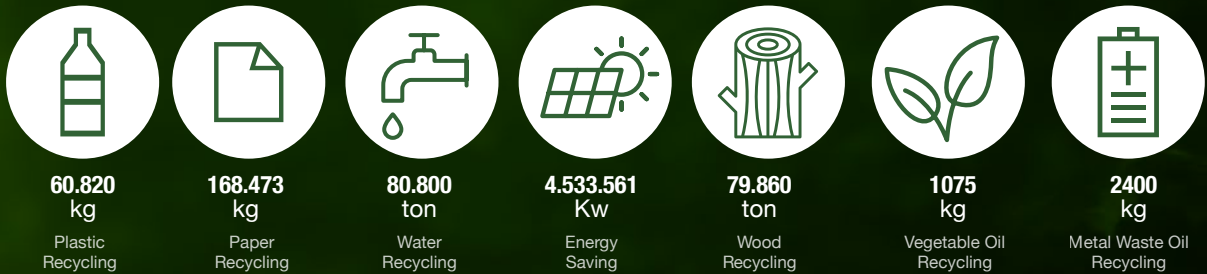

With the project "Development of Stoneware Body and Glaze Formulation Using Colored Porcelain Fragments," we utilized 500 tons of colored fragments that were idle in our warehouses by grinding them and incorporating them into the stoneware body recipe developed. Moreover, approximately 12 tons of colored fragments generated monthly in production are used within the scope of this project, contributing to the recycling of about 150 tons of colored fragments annually. With this perspective, we will continue our efforts with the business model we have created, and in the coming year, in addition to raw material recycling, we aim to recycle a total of 650 tons of porcelain. This will have several positive impacts:

- **Eliminating the need to extract 650 tons of raw materials from quarries, reducing the impact on landscaping and the energy required for extraction/treatment.**
- **Avoiding the transportation of 650 tons of raw materials from the points of origin to Porland Porcelain, resulting in savings in vehicle emissions and fuel usage.**
- **650 tons of waste material that would have been sent to the landfill will become reusable, reducing the fuel and vehicle emissions generated for waste transportation and minimizing the impact on the landfill site and the environment.**
- **The recovery of 650 tons of raw materials will prevent the emission of 1586.4 tons of CO2 greenhouse gases during the production stage alone.**

In 2021, by evaluating our process-based waste:

- 92% of the total 311 tons of waste generated at Porland Porcelain from production processes, equal to 289 tons, was recycled.
- Recycling 40 tons of plastic prevented the emission of 656 tons of greenhouse gases and saved energy equivalent to 640 barrels of oil and 92,384 kWh. The non-disposal of plastic waste saved 368 m3 of storage space and reduced fuel consumption and vehicle emissions for waste transportation.
- Recycling 89.5 tons of paper prevented the emission of 656 tons of greenhouse gases containing carbon dioxide, ensuring the continued production of 1,109,800 m3 of oxygen. This saved the equivalent of the oxygen needs of 3043 people provided by 1521 mature trees, resulted in a monthly water saving of 2864 m3 consumed by 268 families, and saved 156,625 liters of fuel oil consumed for heating by 179 families. Additionally, it saved 366,950 kW/h of electricity, equivalent to the consumption of 1790 families for one month.

Since 2005, we have been contributing to the preservation of natural resources and the reduction of global warming by producing designs with a 100% focus on recycling. Through savings obtained from raw materials, we have increased our recycling volume while conducting activities in line with environmentally friendly production and the zero-waste philosophy, without compromising on quality. With our RE-GEN series, brought to life through the recycling of porcelain fragments, and our Research and Development department creating a unique product range, we have not only reduced our carbon footprint but also pioneered a vision sensitive to climate change. Continuing to set an example for environmental sensitivity, societal benefit, social inclusivity, and cultural sustainability with products developed using up-to-date technologies, from the color used in designs to the application method, we will persist in being a beacon for sustainability.

Alumilite

The Alumilite Collection combines elegance with durability, offering the soft, creamy tone of hard-paste porcelain with exceptional strength. With its exquisite and diverse forms, Alumilite enhances any dining setting for every occasion across cultures.

Alumina-enhanced body delivers a creamy tone with premium strength.

Perfect for both professional and home use.

Resistant to scratches and thermal shocks.

A wide variety of shapes and sizes to suit any preference.

ASTRO

A Universe in Every Plate

Crafted using Porland's newly developed advanced production method, this collection is a refined and distinctive series designed exclusively for top-tier restaurants. The specialized technique ensures that each plate carries its own unique character, transforming every presentation into a singular and memorable experience.

Its deep form structure provides exceptional performance in dishes requiring delicate craftsmanship, offering superior control of volume, light-shadow balance, and focal composition. The striking contrast of black and white draws the dish toward the center, highlighting the chef's creative interpretation.

The collection's durable body and reinforced glaze surface maintain the plate's form and color integrity over long-term, intensive use, offering enhanced resistance against scratches.

VARIA NOIR

A Poetic Signature

Varia Noir stands out as a collection defined by meticulous craftsmanship, a refined aesthetic language, and a form perfectly aligned with contemporary presentation concepts. Its romantic and elegant silhouette meets the high-quality standards and visual coherence demanded by upper-segment venues with remarkable precision.

The series imparts a distinctive character to every plate it presents, adding an emotional signature to the culinary experience. The delicately engineered details of the form make it an indispensable choice for professionals in the patisserie segment, offering pastry creations a striking visual depth.

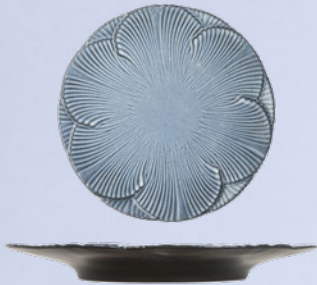

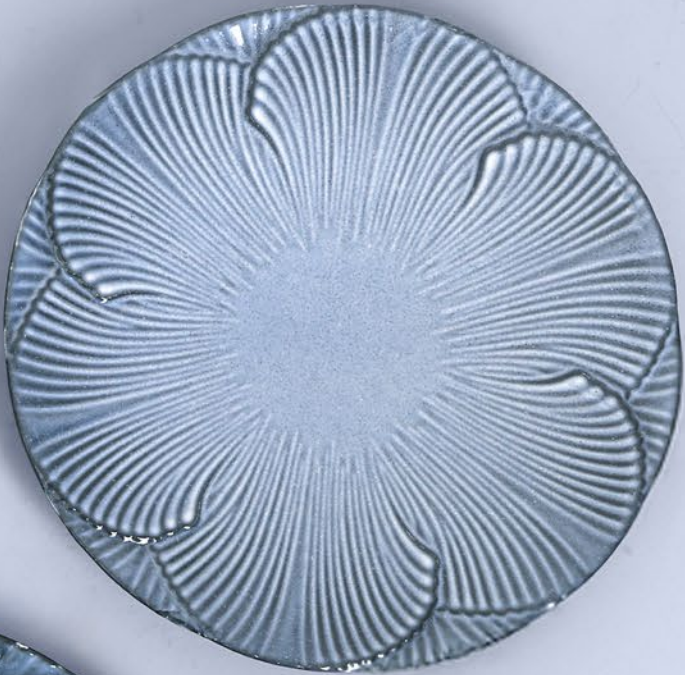

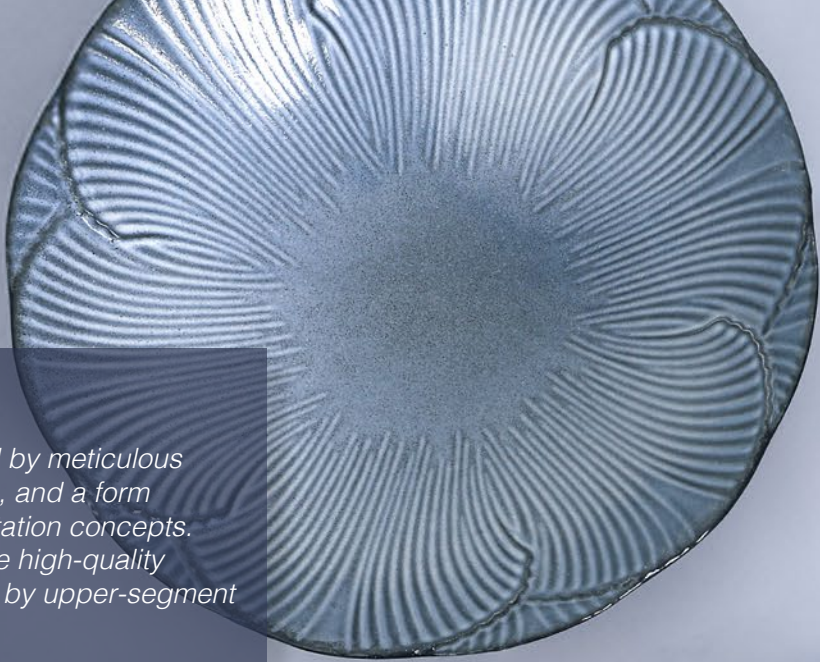

Varia Noir achieves a finely balanced design approach that bridges the expectations of gastronomy professionals with the lyrical nuances of pastry artistry. The collection's form language becomes even more pronounced through the dramatic Noir color alternative. The relief texture on the surface interacts with the specially formulated colored glaze to create a sophisticated and controlled reactive glaze effect that delivers instant impact at the table. This technical integration positions Varia Noir in the premium segment both aesthetically and functionally.

VARIA

A ray of elegance from the deepest depths of the sea... The mysterious harmony of underwater life is skilfully displayed in this plain and elegant set. Inspired by sea shells, the collection's matte off-white colour and original design is eye catching. Produced with Porland's special Alumilite recipe, the Varia Collection is as durable as it is elegant, just like sea shells. Varia is a true Porland classic consisting of dinner plates, soup plates, breakfast and serving plates that come in a choice of different sizes.

Seasons

The Wabi-Sabi Effect on Seasons Collection

Wabi-Sabi, a source of inspiration for our Seasons collection and emerged in Japan in the 16th century, is a philosophy of life that emphasizes the perfection of imperfections. Produced with the inspiration of Wabi-Sabi philosophy and by special processes, Seasons Collection have the colors that came from nature. While Wabi represents simplicity and naturality; Sabi represents the beauty of elapsed time and the reflection of embracing the imperfections that occurring in time. This philosophy arises from the balanced harmony of these two notions. Natural raw materials which are being used in other ceramic glazes are used in the production processes of Seasons products. Reactive glaze, which is special for Seasons Collection, is produced by using different proportions of materials in its recipe. Thanks to usage of reactive glaze each product has a different effect, which makes the product more special. Seasons products are specially produced for you with different effects and tones while the patterns on edges of the products are applied by hand one by one. So, each item in Seasons Collection is original and unique.

LYKKE

Lykke revolves around the philosophy of gathering more of those precious moments of joy, spending happier times at home, creating a pleasant atmosphere at meals, being in the moment, and sharing it with your loved ones. At Porland, we believe happiness comes from being perfectly in tune with nature, hence, Lykke contains pastel colours, natural textures, and minimalist designs, along with color harmonies that bear nature's positivity. Lykke's environmentally friendly manufacturing ensures we are giving back to the nature, to be able to keep being inspired from its beauty.

Since 1976, Porland strives for perfection by means of experience, innovative approaches, and modern manufacturing techniques. We are, and we will be dedicated to share and multiply the joy and happiness in living spaces through our massive product range.

All measurements are in approximate values.

PISA

Italian Presentation Heritage

Pisa is a versatile and high-performance collection that brings together the iconic pizza-presentation culture of Italian cuisine with contemporary gastronomy standards. With its extensive range of sizes, the collection meets the needs of professional kitchens in full, offering a broad usability spectrum from traditional pizza service to modern presentation concepts.

Its wide diameter options make the collection indispensable not only for pizza service but also for sharing plates, appetizers, and contemporary restaurant presentations.

The special glaze technology used on the surface enhances scratch resistance while supporting the long-lasting durability required in professional settings. Thanks to this technical integrity, Pisa maintains both its form and visual quality even in high-volume service environments.

Pisa blends design simplicity with functional excellence, delivering a superior presentation standard aligned with the dynamic rhythm of modern gastronomy.

All measurements are in approximate values.

Pure and Deep

Reflecting the purity and depth, the Aqua Collection is an elegant design on creamy porcelain having aesthetic flake reliefs designed with a melodic rhythm just like a mermaid. It is a collection that will bring elegance to many feasts with the pure energy in its style.

Durable Form

Designed to use in large scale presentations, the Soley Collection stands out for its durability as well as its Aluminated creamy white porcelain color. It is always impressive with its flexible product range consisting of simple and modern forms.

Thanks to its unordinary appearance, Perspective collection was highly acclaimed in its first presentation in London even in designing stage. The collection has brought a new perspective to the tables with its geometrical shape outside the usual square and triangular forms and the creamy white color of aluminated porcelain which is the special recipe of Porland.

RAY

NEW

Textures Guided by Light

The Ray Series introduces a new, contemporary pattern created through a digital printing technique applied on a matte glaze surface. The linear form extending from the center outward reinterprets the motion of light across the plate, adding dynamic depth to each presentation.

The series offers exceptional scratch resistance, ensuring long-lasting performance even in the demanding pace of professional kitchens.

This collection also stands out with its reinforced body structure, low water absorption, and durable glaze technology that preserves surface integrity under heavy service conditions. Together, these features enable the pieces to deliver performance approaching that of porcelain.

Ray unites a modern design language with advanced technical capability, offering professionals a reliable and timeless presentation solution.

REED

NEW

Next-Generation Stoneware

This new addition to the stoneware category offers a sophisticated interpretation shaped by a refined form language and delicate relief texture, responding to the needs of modern gastronomy. The Wax Paper tonal palette—one of the standout colors of the year—brings both warm simplicity and a timeless aesthetic to the collection.

Its highly durable structure makes it suitable for a wide range of uses, from chain restaurants to mid-segment establishments. Thanks to its reinforced body composition and specialized firing technique, the pieces preserve the rustic character of stoneware while delivering performance close to porcelain.

The collection's key technical feature, 0% water absorption, ensures superior hygiene and long-term reliability. This structural integrity maintains the stability of form, surface, and color even under intense service conditions.

The Elegance of Nature

The Lotus Collection brings the ever-renewing cycle of nature into modern gastronomy through its delicately unfolding lotus motif on the inner surface. The pattern's outward-flowing rhythm introduces a controlled sense of movement and visual depth, creating a refined backdrop that enhances the chef's composition.

The collection's high-durability body structure is engineered for the demanding pace of professional kitchens. Its low porosity and reinforced glaze application increase scratch resistance while maintaining exceptional hygiene standards.

The ergonomic rim design ensures a comfortable grip during use. The intricate craftsmanship of the pattern blends aesthetic elegance with functional performance, elevating the collection to a higher segment both visually and operationally.

HEXA

NEW

The Modern Rhythm of Geometry

Hexa is a next-generation collection designed for professional gastronomy, merging contemporary presentation aesthetics with technical functionality. Its multi-layered geometric pattern offers a refined visual appeal while clearly defining the plate's boundaries during service, enhancing overall presentation coherence.

The pattern creates a balanced frame for the dish, providing a visually calming yet composition-guiding backdrop. This allows chefs to achieve a more consistent and harmonious plating flow. The collection's high-durability body structure is engineered to withstand the demands of intensive operations. A specially formulated glaze supports scratch resistance and long-lasting surface performance, even under frequent use.

Its easily stackable form ensures maximum efficiency in compact storage areas, seamlessly adapting to the rapid service cycles of professional kitchens. Hexa delivers a timeless standard of presentation, uniting aesthetic simplicity with functional reliability through its modern geometric identity.

VINTAGE

A piece of stone would outlive any living creature; therefore, they are the eldest and best story tellers of our planet. Inspired from the vintage stones that nature has to offer for us to listen and learn from, the design simply wants to reflect this idea of sharing to be continued with this Porland Stoneware collection.

Hard-Paste Porcelain

Timeless elegance meets unmatched durability in Hard-Paste Porcelain. Its fine texture, brilliant whiteness, and superior glazing make it a symbol of enduring quality for hospitality and an elegant choice for presentations.

Crafted from high-quality raw materials for superior strength and a refined glaze.

Resistant to scratches and thermal shocks.

Smooth, glass-like surface with a timeless white hue.

Nobility of the Palace

A marvellous collection for those who want to decorate their tables with the elegant, embossed structure of Maria. The sophisticated product group, Maria is an ideal choice for feasts fit for nobility.

PERSPECTIVE

A Different Perspective

Designed by the world-famous Studio Levien in England with distinct lines, Perspective Collection is built around the idea of pieces that complement each other.

THE BOWL RANGE

Glamorous and Special

Porland creates this range of bowls for those who would like to feel special and make their guests feel the same; amorphous and conic shapes of the bowls put their signature on glamorous moments.
